

AKVADIV

MALINOVSCHISNENSKY DISTILLERY

SINCE 1871

PRODUCT CATALOGUE

Dear sirs!

JV “Malinovschiznensky Distillery – “AKVADIV” has pleasure to offer you cooperation on the issue of deliveries of natural mineral water, vodka and liquors to Japan.

At our distillery new innovative technology of spirit production was implemented - complete production cycle: from acceptance and storage of grain up to packing of ready products. The technology does not have analogues in Belarus.

We offer you to import our high quality products, which are already appreciated in 22 countries of the world. We produce spirit with very good taste and aroma. It becomes possible thanks to using of malty milk from sprouted grains as saccharifying material and also because we use only selected mellow grain as raw material for our alcohol.

We don't use some artificial additives for the production we make. Our chief production engineer and the laboratory make formulations with natural extracts and essential oils, prepare their selves infusions and aromatic spirits form fruits, spices, herbs and their roots. We also buy from suppliers some extracts for our production, for example, olive flowers extract, but all the extracts we buy are also natural. That's why the quality of our production is appreciated by customers.

The whole production process meets completely international quality standards ISO 9001-2001; system of Hazard Analysis and Critical Control Points and environment management system ISO 14001-2005 are applied at our distillery.

We offer you to import:

- Premium vodka and traditional vodka (HS code 2208 60 110 0);
- Bitters (*HS code 2208 90 560 9*);
- Balsams (*HS code 2208 90 690 0*);
- Sweet liqueurs (HS code 2208 70 100 0);
- Grappa (HS code 2208 20 260 0);
- Whiskey (HS code 2208 30 820 0);
- Mineral water (HS code 2201 10 190 0) .

In case it is necessary, we offer marking of production by excise stamp of your country.

We are ready to organize delivery of production by auto, railway or marine transport to any place of the world. Also we are ready to make products under your trade mark for you.

NATURAL SPARKLING
MINERAL WATER

AKVADIV

PREMIUM MINERAL WATER

The water is extracted from artesian well about 400 meters deep and is poured in ecologically clean glass bottles of nominal volume 0.75 L

The water does not undergo any treatment, except deferrization by air procession and multistep filtration. In the process chemical balance of the product remains the same. This makes the water taste pleasant, and the conditions of extraction and bottling guarantee the original microbiological purity.

Natural mineral water "AKVADIV" annually proves its quality, winning awards at national competitions and tastings
